

Environmental Studies

Summer 2019 Course Offerings—Lehigh University

ES, TLT 368-10 Teaching and Learning with Geospatial Tools ()

CRN 23374 / 3 credits, Prof. Oltman (7/17 - 7/25) M, T, W, Th, F, S; 8:30 - 12:50 p.m.

Exploration of geospatial tools, including but not limited to global positioning systems (GPS), geographic information systems (GIS), and related visualization tools (e.g., Google Earth). Application of these tools and techniques to instructional settings, including appropriate pedagogy and assessment.

ES, GS, SOC 370-10 Globalization and the Environment (SS)

CRN 23462 / 4 credits, Prof. Austin (Session 2) online

This course investigates globalization and the environment including how globalization has influenced society-nature relationships, as well as how environmental conditions influence the globalization processes. A key focus will be on the rapidly evolving global economic and political systems that characterize global development dynamics therefore resource use. Particular attention is paid to the role of multi-national corporations, international trade, and finance patterns and agreements. Questions related to consumption, population, global climate change, toxic wastes, and food production/distribution represent key themes.

ES 396-10 / ES 496-10 Mgt. of NotForProfit Org.

CRN 23701 / 4 credits / CRN 23702 / 3 credits, Prof. Kushner (Session 1) T, Th 4:00 - 6:50 p.m.

This course addresses the effective management of nonprofit organizations. We start by reviewing the community, historical, social and legal contexts of the nonprofit sector in the U.S. These lead into the issues that are central to the course, relating to how nonprofits are managed. We examine structure and administration, leadership and management, marketing, finance, and resource development, and strategy, all in the nonprofit environment. We also highlight some concerns that are especially pressing for managers.

WGSS, SOC 441-10 Gender and Health (SS)

CRN 23470 / 3 credits, Prof. Alang (Session 1) online

Relationships of sex differences and gender norms to disease and longevity. Influence of medical systems on women's lives and the impact of the women's movement on health care. Focus on specific topics, e.g. medicalization and commercialization of women's bodies, the politics of reproductive choices, and mental health.
